- ****Changes** requiring a MICR spec sheet (routing number change) will incur a one-time \$35 set-up charge
- *****Production** time for proofs is 3-5 days

Up or Down?

It seems a very trivial question, except when you're talking about cut sheet checks and the numbering sequence to use. Then it's a very important detail. By choosing a numbering sequence that fits your specific needs, you're letting us know how you expect to see your checks upon opening the shrink-wrapped package. And as always, we make it easy! Simply look at the diagrams below and choose the numbering sequence (A, B, C, or D) that fits your needs, then write it down on your order form. It's just that simple!

If you happen to forget to add the numbering sequence to your order form, don't worry! We'll produce the order using Standard Ascending as the numbering sequence. Or you can give us a call, and tell us how you prefer your cut sheets numbered. We'll be happy to assist you.
